The Healthy Kids Colorado Survey is the state's only comprehensive survey on the health and well-being of young people. In 2017, the survey sampled approximately 56,000 youth from 190 randomly selected middle and high schools statewide. The voluntary, biennial survey collects a wide range of health and behavioral information that helps public, private and community organizations better understand the youth they serve and support them in making healthy choices. The data below represents high school youth.

**Tobacco Use**

33% of Colorado youth are using nicotine.*

*All tobacco products including cigarettes, chew, e-cigarettes, hookah, cigars and others

**Current Use of Tobacco Products**
